Dear Sir/Madam

The inclusion of Washwell Field as a possible development site is neither appropriate or deliverable. The outstanding reason for the site not being deliverable is the very poor access via Lower Washwell Lane and without adequate access the development cannot be approved. The Lane is narrow mostly a single track without a footway. It runs along the recreation field including immediate proximity to the children's playground posing a real risk to children's safety if there was increased traffic. The junction with the A 46 is already unsatisfactory with poor visibility in both directions and to get out at all in safety is already finely balanced with some risk of collision. The traffic may the divert into the village up vicarage street and thereby cause more congestion in the narrow streets there where there is already a lot of backing and shuffling to get through. I understand the District Council has already stated that ' The provision of a satisfactory access remains a matter to be resolved' indicating that there is no plan to resolve the crucial issue of access.

This development should not go ahead

Yours faithfully
