Regarding SDC plan to build 5000 more houses. Before building commences, there is a very important problem to solve NOW!"

The Cam & Dursley Railway Carpark has reached crisis level. The car park is completely full in the mornings! cars overflow onto the road outside where residents have already parked. This is not helped by the traffic generated by the new large housing estate being built opposite. Passengers who need to use the train service can only do so by paying for taxis both ways. This is unacceptable! With the advent of the SDC huge building plan the situation will become far, far worse.

Action to solve the problem must be taken now! not when it is too late.
