1. Background

- 1.1 All district councils in Gloucestershire undertake employment land availability (ELA) surveys to monitor the supply of employment land. This monitoring work is carried out annually and is essential for the evidence base supporting the adopted Local Plan.
- 1.2 This ELA survey covers the period 1st April 2020 to 31st March 2022.
- 1.3 The adopted Local Plan covers the period 2006 to 2031 with an employment land requirement for “B” uses over the plan period set at 58 hectares. Table 1 sets out the employment land supply for the plan period and compares supply with this requirement.
- 1.4 The adopted Local Plan has been reviewed and a new Local Plan was submitted for examination on 25 October 2021. The Draft Local Plan covers the period 2020 to 2040 with an employment land requirement for (E(g) (i/ii), E(g) (iii), B2 and B8 uses over the plan period set at 62.4-71.8 hectares. Table 2 sets out the employment land supply for the plan period and compares supply with this requirement.

2. Survey Methodology

- 2.1 This report involved researching all planning permissions for employment use gained over the two-year period between 1st April 2020 and 31st March 2022. Employment monitoring was not undertaken in 2021.
- 2.2 The Employment Land Availability Report focuses primarily on Class B1 (Business), now part of use class E, Class B2 (General Industrial), Class B8 (Storage and Distribution).
- 2.3 This document contains information on committed and completed employment land gain and loss in the Stroud District at 1 April 2022.
- 2.4 Sites which have received planning permission but have not yet been implemented were investigated to ascertain whether the permissions were still valid or lapsed.
- 2.5 Sites which have previously been in employment use but have since been redeveloped for other uses or demolished, are identified within the ‘losses’ section of the report. Potential losses are also indicated where planning consents have been given that will involve loss of employment land, but as yet have not been fully implemented.
- 2.6 While accurate at the time of publication, this report is subject to change due to continuing monitoring.

3. Summary of Employment Land Supply:

3.1 Table 1 below illustrates the completions (site area ha), for the adopted Local Plan period since 2006, and commitments for Stroud District set against the adopted Local Plan 2015 employment target. Table 2 updates the completions, for the submitted Draft Plan period since 2020, and commitments at 01 April 2022 set against the submitted Draft Plan target.

4. Summary of survey results

Adopted Local Plan 2015

- 4.1 The amount of land developed for 'B' use employment between 2006 and 31 March 2022 was **47.32** hectares (Tables 2a and 2b). In terms of land with planning permission for 'B' use employment, this figure is now **37.39** hectares (Tables 3a & 3b). **8.40** hectares of land remains without planning permission on 2015 Local Plan allocations.
- 4.2 With regards to losses, the amount of 'B' use employment land lost to other uses between 2006 and 31 March 2022 was **36.80** hectares (Table 4a & 4b). Potential losses as at 31st March 2022 (Tables 4c and 4d) stood at **6.33** hectares.
- 4.3 Table 1 shows that, as at 1st April 2022 Stroud District has a net provision of employment land for "B" uses of about **49.98** hectares. This compares with a requirement of **58** hectares, indicating a requirement to find an additional **8.02** hectares of land by 2031.

Submitted Draft Plan 2021

- 4.4 Paragraph 2.6.3 of the draft Plan sets out an objectively assessed requirement of between **62.4 and 71.8** hectares of employment land (E(g) (i/ii), E(g) (iii), B2 and B8 for the plan period recommended by the Gloucestershire Economic Needs Assessment (GENA), based on expected labour supply and a growth scenario supporting further growth in the key Local Industrial Strategy sectors.
- 4.5 The amount of employment land lost to other uses between 2020 and 31 March 2022 was **8.35** hectares (Table 4a). Potential losses from extant planning permissions as at 1st April 2022 (Tables 4c and 4d) stood at **6.33** hectares. Potential losses from windfall sites, based on Local Plan methodology, will be **7.32** hectares over the remaining 15yrs of the plan period.
- 4.6 The resulting minimum employment requirement of **84.4 - 93.8ha** is now needed to meet objectively assessed need for the plan period to 2040.
- 4.7 On the supply side, the amount of land developed for (E(g) (i/ii), E(g) (iii), B2 and B8 employment between 2020 and 31 March 2022 was **15.02** hectares (Tables 2a). In terms of land with planning permission, this figure is now **37.39** hectares (Tables 3a & 3b). The development strategy for the distribution of new employment land set out in Core Policy CP2 provides **79** hectares of employment land at eight strategic employment locations across the District.

4.8 Table 2 shows that, as at 1st April 2022 Stroud District has a provision of employment land for (E(g) (i/ii), E(g) (iii), B2 and B8 uses of about **131.41** hectares. This compares with a requirement of **62.4 - 71.8ha**, indicating a current surplus of **37.6 - 47.0ha** up to 2040.
