

NOTES

Concrete fence posts to be shortened to 800mm from ground and cut at a gentle pitch so to shed water.

New holes drilled 100mm below top of post and new straining wire fitted.

The existing wire mesh is to be cut and folded over ensuring that no sharp edges are left. Where sections of fence are damaged new sections can be installed.

Alongside the fence on the side of the park a new nature friendly, native hedgerow is to be planted to grow alongside and into the fence.
