Dear Planning Dept,  
re Plans for 138 New Homes  
at Castle Stream Farm

Being an unfamiliar user of the internet  
I could not find the necessary online form  
to make my protestations known.

I won't repeat the objections raised  
in 2014 but will reiterate my deep  
concerns upon how traffic will further  
the congestion and increase the risk factor  
at this end of Woodmaneeke and the  
foot of W.L. Faway Hill.

Already we have speeding and increasing  
number of lorries of some 40-50 tons  
shuddering to a halt where the road is too  
narrow for parked cars and two lanes of traffic.  
We have said lorries and tractors mounting  
the pavement six feet from our front

door & windows. The lights, noise and air pollution that 138 new homes will bring plus the initial construction traffic will seriously blight this AONB.

Clearly the developers will not give in so I ask that common sense and consideration to the many existing rate payers will provide resistance to this ill-conceived profit driven plan.

Yours sincerely

Dear Planning Dept's

re Plans for 138 New Homes  
at Castle Stream Farm

Being an organisation near of the internet  
I could not find the necessary online form  
to make my protestations known

I can't expect the objections raised  
in 2014 but will reiterate my deep  
concerns upon how traffic will further  
the congestion and increase the risk factor  
at this end of Woodmancocke and the  
foot of Wk. Railway H.11.

Already we have speeding and increasing  
number of lorries of some 40-50 tons

door windows. The light rise and air  
pollution that 138 new homes will  
bring plus the initial construction traffic  
will seriously blight Ais 90 NB.  
Clearly the developer will not give  
in so I add that common sense and  
consideration to the many existing rate payers  
will provide assistance to Ais ill conceived  
profit driven plan.

Yours sincerely

Mr. K. Skemf Ais
